ATTN: Mr. John E. Dolan
Vice Chairman
Engineering and Construction
1 Riverside Plaza
Columbus, OH 43216

Gentlemen:

This refers to the special safety inspection conducted by Messrs. Tony Fresco, Jeff Holmes, and Joseph Ulie of this office on July 7-17 and September 15, 1987, of activities at the D. C. Cook Nuclear Plant, Units 1 and 2, authorized by NRC Operating Licenses No. DPR-58 and No. DPR-74, and to the discussion of our findings with Mr. Wilbur G. Smith and others of your staff at the conclusion of the inspection.

The enclosed copy of our inspection report identifies areas examined during the inspection. Within these areas, the inspection consisted of a selective examination of procedures and representative records, observations, and interviews with personnel.

During this inspection, certain of your activities appeared to be in violation of NRC requirements, as described in the enclosed Notice. The inspection showed that action had been taken to correct the identified violations and to prevent recurrence. Our understanding of your corrective actions are described in Paragraphs 2.r and 2.s of the enclosed inspection report. Consequently, no reply to the violations is required, and we have no further questions regarding these matters at this time. In addition, based on my inspectors review, it appears that further management attention is needed to resolve certain emergency remote shutdown and associated repair procedures discrepancies.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter and the enclosed inspection report will be placed in the NRC Public Document Room.
