Gentlemen:

This refers to the routine safety inspection conducted by Messrs. A. G. Januska and R. Bocanegra of this office on January 12-20, 1989, of activities at D.C. Cook Nuclear Plant, Units 1 and 2, authorized by NRC Operating Licenses No. DPR-58 and No. DPR-74, and to the discussion of our findings with Mr. L. Gibson and others of your staff on January 20, 1989, and to the telephone discussion with Messrs. Gumms and Looker on January 26-27 and February 1, 1989 and with Mr. H. Jones of AEPSC on February 10, 1989.

The enclosed copy of our inspection report identifies areas examined during the inspection. Within these areas, the inspection consisted of a selective examination of procedures and representative records, observations, and interviews with personnel. In addition, our Mobile Laboratory was at the site during the inspection to perform independent measurements of radioactivity.

No violations of NRC requirements were identified during the course of this inspection.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter and the enclosed inspection report will be placed in the NRC Public Document Room.

We will gladly discuss any questions you have concerning this inspection.

Sincerely,

L. Robert Greger, Chief
Reactor Programs Branch
