

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555-0001

November 24, 2017

Mr. Kyoungsik Choi
General Manager of Doosan
Quality Assurance Team
Doosan Heavy Industries and Construction
555 Gwigok-Dong, Changwon
Gyeongnam 641-792, Korea

SUBJECT: DOOSAN HEAVY INDUSTRIES AND CONSTRUCTION RESPONSE TO THE
NUCLEAR REGULATORY COMMISSION UNRESOLVED ITEM
99901373/2014-201-01

Dear Mr. Choi:

Thank you for your September 20, 2017, and October 15, 2017, electronic responses (Agencywide Document Access and Management System (ADAMS) Accession Numbers ML17270A305 and ML17292B523 in response to the Unresolved Item (URI) documented in U.S. Nuclear Regulatory Commission (NRC) inspection report (IR) 99901373/2014, related to the Doosan disposition of certain NCRs as "use as is" without an adequate technical justification. The NRC staff reviewed your response and found it acceptable. Specifically, Westinghouse had continued to maintain the tensile testing requirement, but clarified that using filler material, without the additional tensile tests, does not violate ASME Code requirements and will not have negative impact on the form, fit, function, or structural integrity of the material. Based on the above, the NRC has closed URI 99901373/2014-201-01 and have no further questions or comments at this time related to the URI. Please contact Ramón L. Gascot at (301) 415-2004 or via electronic mail at ramon.gascot@nrc.gov, if you have any question or need assistance regarding this matter.

Sincerely,

/RA/

John P. Burke, Chief
Quality Assurance Vendor Inspection Branch-2
Division of Construction Inspection
and Operational Programs
Office of New Reactors
