REGULATORY DOCKET FILE COPY

Dear Mr. Dolan:

In May 1976, we issued guidelines reflecting the NRC's policy regarding the implementation of General Design Criterion 3 - Fire Protection. Since that time, you have performed a fire hazards analysis for your facility and have compared its fire protection program with the NRC guidelines.

In late 1976, we set October 1980 as the date for completing the implementation of all modifications associated with this program. This implementation schedule recognized that such modifications should be completed as soon as practical, with due consideration of the nature of the modifications. For example, minor modifications, adoption of administrative controls and additional portable equipment would be completed within six months; however, major modifications would require a year or more to complete and some modifications would be coordinated with refueling outages.

By their Memorandum and Order in the matter of the Union of Concerned Scientists' Petition for Emergency and Remedial Action, dated April 13, 1978, the Commission directed the staff to use their best efforts to maintain this schedule, and also directed that the Commission be advised if any slippage is anticipated, along with suggested corrective actions.

We urge you to apply your best efforts to maintain your schedules for completion of all of the fire protection modifications at your facilities and to submit, on an expedited basis, any information that is still outstanding with regard to open items and required design details.

Sincerely,

Original signed by
Darrell G. Eisenhut

Mr. Harold R. Denton, Director
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Denton:

This letter and its attachments respond to your letter dated June 29, 1979 in which you requested information on the technical and management resources available to us to respond to unusual events such as a TMI-2 type accident. On July 30, 1979 a two week extension to August 17, 1979 was granted by your Mr. Walter P. Haass.

A description of the contents of the attachments follows:

Attachment A - provides an organizational chart and biographical sketches or position descriptions of those individuals shown on the chart. This attachment answers that portion of the request under Section I (Management Resources (Off-site)), subparagraphs A. , B., and C.

Attachment B - provides the organizational chart and other information in response to your request under Section II. A (Technical Resources - Plant Staff), subparagraphs 1. , 2., and 3.

Attachment C - provides that information requested under Section II.B (Technical Resources - Off-site (Non-plant staff)), subparagraphs 1., and 2.
