SEP 13 1979

Docket Nos. 50-316
and 50-316

MEMORANDUM FOR: Thomas M. Novak, Chief
Division of Systems Safety
Office of Nuclear Reactor Regulation

FROM: A. Schwencer, Chief
Operating Reactors Branch #1
Division of Operating Reactors

SUBJECT: BULLETINS AND ORDERS TASK FORCE REVIEW OF D. C. COOK
MODIFICATIONS TO AUXILIARY FEEDWATER SYSTEMS

The attached TACs form and request for license amendment from Indiana and Michigan Power Company are forwarded to you for the Bulletin and Orders Task Force review. This amendment in the D. C. Cook Nuclear Plant would separate shared auxiliary feedwater systems and convert the turbin driven auxiliary feed pumps from AC to DC.

Our request for your review was discussed with Patrick O'Reilly and it was felt that at this time, that in view of your review of all auxiliary feed-water systems, the B & O review would be appropriate. This is consistent with discussions between D. Eisenhut and D. Ross on assignment of reviews generated by Bulletins and Orders. The product of your review should be a draft input for an SER to support a license amendment package which DOR will issue. In order to meet the approval date requested by the licensee, we will need your SER input by the end of October, 1979. If there are questions to be asked of the utility, they can be forwarded as an attachment to a letter from this office or the DOR project manager for D. C. Cook, Dave Wigginton X27167, can arrange a conference call. He can also set up a meeting with the utility if you feel one would be beneficial.

Please make the contacts with the utility thru the DOR project manager. The TAC's form has space for you to indicate those individuals the B & O Task Force assigns to this review. If you have any questions, please let me or Dave Wigginton know.
