Donald C. Cook Nuclear Plant Unit No. 1
Docket No. 50-315
License No. DPR-58

Mr. Harold R. Denton, Director
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. Denton:

This will confirm our telephone discussion with members of your staff on December 26, 1979 with respect to the status of NUREG-0578 requirements for Unit 1. By January 1, 1980 we will implement on Unit 1, requirements Nos. 2.1.3.a, Direct Indication of Safety Valve Position, 2.1.3.b, Subcooling Meter, and 2.1.8.a, Post Accident Sampling, in the same manner as we are doing it for Unit 2. The Unit 2 actions to which we refer are those described in our letter AEP:NRC:00253B of December 19, 1979. With respect to Item 2.1.6.a, System Integrity for High Radioactivity, we will not perform a leakage test of the letdown and charging system on Unit 1. The leakage test of the letdown and charging system of Unit 2 serves the purpose of perfecting and gaining experience on the methodology. When we complete that work on Unit 2, we will begin our overall program to measure the leakage of systems in both Units.

Very truly yours,

R. S. Hunter
Vice President
