To whom it may concern,

In accordance with 10 CFR 30.36(d)(4), Wesleyan University is notifying the Nuclear Regulatory Commission (NRC) Region 1 that no principal activities have been conducted for a period of 24 months at our Hall Atwater Laboratory facility located at 52 Lawn Avenue, Middletown Ct. Hall Atwater Laboratory is listed as the licensed facility on our Materials License No. 06-00483-10.

Licensed radioactive material was last used in Hall Atwater Laboratories on September 14, 2015. The use of radioactive materials in research has reduced in recent years with the availability of non-radioactive material methods.

Wesleyan University intends to continue use of principle activities by January 1, 2018 as we are ramping up research in our Bio Chemistry program with the intent of utilizing 3H-2D-glucose.

Under 10CFR30.36(f) we respectfully request an extension on 10CFR30.36(d). We fully expect principal activities to return to normal once this new research protocol is approved and put into place.

Thank you for your time and consideration with respect to this notification. Please do not hesitate to contact me [wnelligan@wesleyan.edu](mailto:wnelligan@wesleyan.edu) or 860-685-2732 should you have any question or comments regarding this request.

Sincerely
