American Electric Power Service Corporation
ATTN: Mr. John Dolan, Vice President
1 Riverside Plaza
Columbus, Ohio 43216

Gentlemen:

Enclosed is Check No. 200-0291 dated July 18, 1984, in the amount of \$4,400 which accompanied your application dated July 23, 1984, for relief from certain ASME Code requirements for the Donald C. Cook Nuclear Plant Unit Nos. 1 and 2.

Since your application was filed after the June 20 effective date of the revised 10 CFR 170 (copy enclosed) on fees, it is subject to the provisions of the revised rule. This rule requires that licensees remit an application fee of \$150 with each application for license amendment, relief, exemptions and other requests. Subsequently, the NRC will bill the licensee at six-month intervals for the review of the application until the review is completed. The fees for license amendments and other approvals are based on the full cost (professional staff hours and contractual services) expended for the review. However, the maximum which can be charged for an application is the amount in the rule in effect at the time the amendment or other approval is issued. This amount is currently \$164,600 (10 CFR 170.21.A). Credit for the \$150 will be given at the time the first bill is sent your Corporation. Any applications filed by your Corporation before June 20, 1984, will continue to be processed in accordance with the provisions of 10 CFR 170.22 of the March 23, 1978 regulations.

It is requested that your Corporation remit the required application fee of \$150 for your July 23 application. For your information, a brief discussion of fees for applications and other requests filed before and after June 20, 1984, is contained in Enclosure 3 to this letter. If there are questions regarding fees, please contact us on 301-492-7225.

Sincerely,

Original Signed by:

NOTE REGARDING FEES FOR LICENSE AMENDMENTS AND OTHER APPROVALSJune 20, 1984

Applications for license amendments (including construction permit extension requests), reliefs, exemptions and other approvals filed with the USNRC prior to June 20, 1984, will continue to be assessed fees based on 10 CFR 170.22 of the March 23, 1978 regulation. Applications filed on or after June 20, 1984, should be in accordance with the enclosed revised Part 170 that became effective on June 20, 1984. The revised rule eliminates the fee Classes I through VI and requires licensees to remit an application fee of \$150 with each application for license amendment, relief and exemption from the requirements of certain regulations, and other approvals. Thereafter, at six-month intervals, the USNRC will bill the licensee for the review of the application until it is completed. Under the revised rule, the fees for license amendments and other approvals are based on the full cost (professional staff hours and contractual services) expended for the review. However, the maximum which can be charged for an application is the amount in the rule in effect at the time the amendment or other approval action is issued. The amount is currently \$164,600 (10 CFR 170.21.A) for power reactor cases. Credit for the non-refundable \$150 application fee (see Footnote 2 of 170.21) will be given at the time the first bill is sent to the licensee. The first six-month bills are expected to be sent out to licensees approximately March 1, 1985 and will cover the six-month period ending December 22, 1984.
