Docket No. 50-315  
No. 50-316

American Electric Power Service  
Corporation  
Indiana Michigan Power Company  
ATTN: Mr. M.P. Alexich  
Vice President - Nuclear  
Operations Division  
1 Riverside Plaza  
Columbus, OH 43216

Gentlemen:

This refers to the routine safety inspection conducted by B. L. Jorgensen, M. J. Farber, and D. G. Passehl of this office, and by D. B. Waters, a consultant to this office, on February 8 through March 21, 1989, of activities at the Donald C. Cook Nuclear Plant, Units 1 and 2 authorized by NRC Operating Licenses No. DPR-58 and DPR-74 and to the discussion of our findings with W. G. Smith, Jr., and others of your staff at the conclusion of the inspection.

This inspection concluded an extended effort with regard to the Unit 2 Steam Generator Repair Project. Our inspections examined: construction activities such as concrete placement, welding, and nondestructive examination; training; radiation protection; modifications; and restart testing. Previous periodic reports have documented earlier findings.

The enclosed copy of our inspection report identifies areas examined during the inspection. Within these areas, the inspection consisted of a selective examination of procedures and representative records, observations, and interviews with personnel.

During this inspection, certain of your activities appeared to be in violation of NRC requirements, as specified in the enclosed Notice. A written response is required.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter, and the enclosed inspection report will be placed in the NRC Public Document Room.

The responses directed by this letter and the accompanying Notice are not subject to the clearance procedures of the Office of Management and Budget as required by the Paperwork Reduction Act of 1980, PL 96-511.
