Gentlemen

This refers to the routine safety inspection conducted by B. L. Jorgensen, D. G. Passehl and others of this office on April 26 through June 6, 1989, of activities at the Donald C. Cook Nuclear Plant, Units 1 and 2 authorized by NRC Operating Licenses No. DPR-58 and DPR-74 and to the discussion of our findings with W. G. Smith, Jr., and others of your staff at the conclusion of the inspection.

The enclosed copy of our inspection report identifies areas examined during the inspection. Within these areas, the inspection consisted of a selective examination of procedures and representative records, observations, and interviews with personnel.

No violations of NRC requirements (for which a Notice of Violation was deemed appropriate) were identified during the course of this inspection.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter, and the enclosed inspection report will be placed in the NRC Public Document Room.

We will gladly discuss any questions you have concerning this inspection.
