Docket No. 50-315  
No. 50-316

American Electric Power Service  
Corporation  
Indiana Michigan Power Company  
ATTN: Mr. M.P. Alexich  
Vice President - Nuclear  
Operations Division  
1 Riverside Plaza  
Columbus, OH 43216

Gentlemen:

This refers to the special safety inspection conducted by E. R Schweibinz and others of this office from March 13 through August 22, 1990, of maintenance activities at the Donald C. Cook Nuclear Plant, Units 1 and 2, authorized by NRC Operating Licenses No. DPR-58 and DPR-74 and to the discussion of our findings with J. Rutkowski, and others of your staff at the conclusion of the inspection.

The enclosed copy of our inspection report identifies areas examined during the inspection. Within these areas, the inspection consisted of a selective examination of procedures and representative records, observations, and interviews with personnel.

Many improvements in maintenance support systems were observed as well as improvements in housekeeping and the material condition of the plant. Although the inspection was limited in scope, a few instances of less than adequate maintenance procedures and one case of lack of procedures were identified. The recently implemented and planned changes should result in an overall improvement in plant maintenance; however, significant change is not yet evident.

No violations of NRC requirements were identified during the course of this inspection.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter, and the enclosed inspection report will be placed in the NRC Public Document Room.
