Walt W. Lilly, Ph.D.
Radiation Safety Officer
Southeast Missouri State University
Department of Biology
One University Plaza
Cape Girardeau, MO 63701

SUBJECT: TERMINATION OF YOUR NRC RADIOACTIVE MATERIALS LICENSE

Dear Dr. Lilly:

In letter dated August 31, 2017, (ML17244A731, including attachments), you contacted the U.S. Nuclear Regulatory Commission (NRC) and indicated that you wish to terminate NRC Material License No. 24-09296-02.

The NRC staff has reviewed your final status surveys. Based on its review, the staff has concluded that all licensable radioactive material has been removed from Southeast Missouri State University facilities and residual radioactive material attributable to licensed activities does not exceed current NRC criteria. Based on these conclusions no further remediation or actions with respect to NRC regulated material is required. Your facilities are suitable for unrestricted use and NRC Material License No. 24-09296-02 is hereby terminated.

In accordance with 10 Code of Federal Regulations 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

If there are any questions, please contact me at (630) 829-9887.

Sincerely,

A handwritten signature in black ink, appearing to read "Cassandra F. Frazier".

Cassandra F. Frazier
Senior Health Physicist
