Dear Mr. Fitzpatrick:

SUBJECT: DONALD C. COOK NUCLEAR PLANT, UNITS 1 AND 2 - WITHDRAWAL OF
AMENDMENT REQUEST (TAC NOS. M79934 AND M79935)

By letter dated January 15, 1991 (AEP:NRC:1142) you requested license amendments for D. C. Cook Units' 1 and 2 which would modify the surveillance requirements of Technical Specifications (TS) 3/4.8.2.3 and 3/4.8.2.5. Additionally, you proposed what you believed to be an editorial change to TS 3/4.8.1.1 for emergency diesel generator load rejection surveillance testing. The staff responded, in part, to your request with the issuance of license Amendments 155 and 139 for D. C. Cook Units 1 and 2, respectively.

Subsequently, as discussed with your staff, we have determined that the changes requested of TS 3/4.8.1.1 would not be editorial in nature and might create ambiguity in the TS by introducing an undefined term, i.e. "steady state," into the acceptance criteria for that surveillance. As a result of our discussions, you elected to withdraw the remainder of your application by letter dated November 4, 1991.

The Commission has filed the enclosed Notice of Withdrawal of Application for Amendments to Facility Operating Licenses with the Office of the Federal Register for publication.

Sincerely,

Original Signed by
