NOV - 4 1992

Docket No. 50-315
Docket No. 50-316

Indiana Michigan Power Company
ATTN: Mr. E. E. Fitzpatrick
Vice President
Nuclear Operations Division
1 Riverside Plaza
Columbus, OH 43216

SUBJECT: NRC INSPECTION REPORTS NO. 50-315/92015(DRS);
NO. 50-316/92015(DRS)

Dear Mr. Fitzpatrick:

This refers to the routine safety inspection conducted by R. A. Langstaff, G. M. Nejfelt, and P. R. Rescheske from this office on August 31 through October 9, 1992. The inspection included a review of activities authorized by NRC Operating Licenses No. DPR-58 and No. DPR-74 for the D.C. Cook Nuclear Power Plant, Units 1 and 2. A discussion of our findings was held with you and members of your staff at the conclusion of the inspection.

The purpose of this inspection was to assess the quality and effectiveness of engineering involvement in plant activities. The enclosed copy of our inspection report identifies areas examined during the inspection. Within these areas, the inspection consisted of a selective examination of procedures and representative records, observations, and interviews with personnel.

No violations of NRC requirements were identified during the course of this inspection. Improvements in communication between corporate design engineering and plant engineering was recognized as compared to previous inspections. This improvement was evident during the post-modification testing phase of the design change process.

According to 10 CFR 2.790 of the Commission's regulations, a copy of this letter and the enclosed inspection report will be placed in the NRC Public Document Room.
