UNITED STATES
NUCLEAR REGULATORY COMMISSION
REGION III
799 ROOSEVELT ROAD
GLEN ELLYN, ILLINOIS 60137

NOV 11 1992

Docket No. 50-315
Docket No. 50-316

Indiana Michigan Power Company
ATTN: Mr. E. E. Fitzpatrick
Vice President
Nuclear Operations Division
1 Riverside Plaza
Columbus, OH 43216

Dear Mr. Fitzpatrick:

This refers to the routine safety inspection conducted by J. A. Isom and D. J. Hartland of this office on September 16, 1992, through October 27, 1992, of activities at the Donald C. Cook Nuclear Plant, Units 1 and 2, authorized by NRC Operating Licenses No. DPR-58 and DPR-74, and to the discussion of our findings with A. A. Blind and others of your staff at the conclusion of the inspection. This refers also to a routine management meeting conducted at the plant site on October 22, 1992.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress. Items discussed at the management meeting are also summarized.

During this inspection period, failure to perform increased emergency diesel generator surveillances based on a number of previous failures was a violation of NRC requirements. However, the violation will not be subject to enforcement action because the criteria specified in Section V.A of the "General Statement of Policy and Procedure for NRC Enforcement Actions," (Enforcement Policy, 10 CFR Part 2, Appendix C, (1992)), were satisfied. The circumstances surrounding the missed diesel generator surveillances are discussed in paragraph 5b of this report.

One unresolved item and two inspector followup items were identified and are discussed in the enclosed report. These matters will be inspected further during future inspections.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter and the enclosed inspection report be placed in the NRC Public Document Room.
