Chris,

Our Engineering says this change is no problem at all. It will be in Revision 2.

Tim

Hi Chris,

I forgot to mention to GE, when they are modifying their loading instructions, they need to correct the first sentence of the first bullet under Step 2 in Section 7.5.1.

It currently says: Only radionuclides (alpha and beta emitters) with activity greater than 1 Ci must be entered into the loading table.

It should say: Only radionuclides (alpha, beta and gamma emitters) with activity greater than 1 Ci must be entered into the loading table.

Thanks,
Veronica
