**Subject:** THE CURATORS OF THE UNIVERSITY OF MISSOURI MASTER INSPECTION PLAN – CALENDAR YEAR 2018  
**Date:** Tuesday, November 28, 2017 7:41:00 AM

---

Dear Mr. Houts:

In accordance with the U.S. Nuclear Regulatory Commission (NRC) Inspection Manual Chapter 2602, "Decommissioning Oversight and Inspection Program for Fuel Cycle Facilities and Materials Licensees," the NRC Region III staff and management have developed a Master Inspection Plan (MIP) for The Curators of the University of Missouri (University of Missouri or licensee). The plan is based on your anticipated radiological characterization activities and your current radiological maintenance of Pickard Hall for January – December 2018. The plan outlines how we intend to focus our Regional inspection resources to provide oversight for significant decommissioning activities.

Because this MIP is based, in part, on your proposed schedule of significant decommissioning activities for 2018, the plan and focus of the NRC inspection activities may change to reflect a change in your planned decommissioning activities or your performance. To ensure that his MIP remains current, we request that you keep the Materials Control, ISFSI, and Decommissioning Branch staff informed of any significant changes in your proposed schedule of decommissioning activities. We will inform you of any significant change to our decommissioning inspection schedule for Pickard Hall.

We currently project that Region III will conduct 3 site inspections at the University of Missouri through December 2018 to evaluate radiological conditions and decommissioning activities. These potential inspection will be in addition to any routine inspections related to non-decommissioning activities under your license. The specific procedures that may be used during these inspections are listed below and will depend on the specific decommissioning activities being conducted. The NRC may also be using Oak Ridge Associated Universities (ORAU) to support NRC's review of your decommissioning activities.

Inspection Procedure	Title
IP 83822	Radiation Protection
IP 86740	Inspection of Transportation Activities
IP 87102	Maintaining Effluents from Materials Facilities As Low As
As	Reasonably Achievable (ALARA)
IP 87104	Decommissioning Inspection Procedure for Materials Licensees
IP 88035	Radioactive Waste Processing, Handling, Storage, and Transportation
IP 88045	Environmental Protection

The NRC reserves the right to add any inspection procedure or perform additional site inspections depending on the decommissioning activities being performed to ensure compliance with NRC regulations and public health and safety.

In accordance with Title 10 of the *Code of Federal Regulations* (CFR) 2.390 of the NRC's

"Rules of Practice," a copy of this email will be available electronically for public inspection in the NRC's Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC's website at <http://www.nrc.gov/reading-rm/adams.html>.

We will gladly discuss any questions you may have regarding these inspection plans. If you have questions, please contact Michael LaFranzo at 630-829-9865.
