February 10, 1995

Indiana Michigan Power Company
ATTN: Mr. E. E. Fitzpatrick
Senior Vice President
Nuclear Generation
1 Riverside Plaza
Columbus, OH 43216

Dear Mr. Fitzpatrick:

This refers to the routine safety inspection conducted by Messrs. J. Isom, D. Hartland, C. Orsini, and R. Bywater of this office from December 17, 1994 through January 30, 1995. The inspection included a review of activities at your Donald C. Cook Nuclear Plant, Units 1 and 2. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of a selective examination of procedures and representative records, observations, and interviews with personnel.

No violations of NRC requirements were identified during this inspection. However, we did identify one area of concern. Previous inspection reports 50-315/94018 and 50-316/94018 documented problems regarding failure to remove action request (AR) tags upon resolution of the deficiencies documented on the tags. While your long term corrective actions are not due for completion until June 1, 1995, this inspection showed that isolated examples are still occurring. We understand that you plan to reassess your interim corrective actions. This area will be monitored during future inspections.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter and the enclosure will be placed in the NRC Public Document Room.

We will gladly discuss any questions you have concerning this inspection.

Sincerely,

Original signed by
I. N. Jackiw for
Wayne J. Kropp, Chief
Reactor Projects Section 2A
