Federal Emergency Management Agency

Washington, D.C. 20472

OCT 1 - 1990

Mr. Frank J. Congel
Director, Division of Radiation Protection
and Emergency Preparedness
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Congel:

Enclosed is a copy of the report for the April 3, 1990, exercise of the offsite radiological emergency response plans, sitespecific to the D. C. Cook Nuclear Power Station. Berrien County, as well as the American Electric Power Company fully participated in the exercise. The State of Michigan partially participated in the exercise. The report, dated July 24, 1990, was prepared by the Federal Emergency Management Agency (FEMA) Region V staff.

There were no Deficiencies or Areas Requiring Corrective Action identified during the April 3, 1990, exercise. The FEMA Region V staff has forwarded a copy of the exercise report to the State.

Based on the results of the April 3, 1990, exercise, FEMA considers that offsite radiological emergency response plans and preparedness are adequate to provide reasonable assurance that appropriate measures can be taken offsite to protect the health and safety of the public in the event of a radiological emergency at the site. Therefore, the Title 44 CFR, Part 350 approval of the offsite radiological emergency response plans and preparedness for the D. C. Cook Nuclear Power Station granted on September 28, 1983, continues to be in effect.

If you have any questions, please feel free to contact Craig S. Wingo, Chief, Technological Hazards Division, on 646-3026.

Sincerely,

Dennis H. Kwiatkowski

Assistant Associate Director

ums H. Kunattand.
