Gentlemen:

SUBJECT: CONFIRMATION OF ACTION

This refers to our telephone conversation between C. O. Woody and J. P. O'Reilly on September 5, 1979 and our previous immediate action letter of August 31, 1979 concerning the overflow of the Turkey Point Unit 4 Spent Fuel Pit. With regard to the matters discussed, it is our understanding that you will take the following additional actions:

1. Remove contaminated soil and rocks near the fuel handling building and near the dry well for proper disposal within thirty days. If removal is not considered appropriate, information will be provided to the NRC Region II office to justify an acceptable alternative.
2. Implement a sampling program of all storm drain systems to assure that any radioactive discharges from these sources are accurately determined.
3. Investigate to determine the source, concentration and quantity of contamination, based on the above sampling program, in the affected storm drain systems. The results of this investigation, including appropriate corrective actions, will be reported to NRC Region II by October 5, 1979.
4. Reevaluate the periodic sampling program for other normally nonradioactive systems. This reevaluation shall include, but not be limited to, the sanitary sewer system and the potable water supply.
