Office of Nuclear Reactor Regulation
Attention: Mr. Darrell G. Eisenhut, Director
Division of Licensing
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Eisenhut:

Re: Turkey Point Units 3 and 4
Docket Nos. 50-250 and 50-251
Proposed Amendment to Facility
Operating Licenses DPR-31 and DPR-41

In accordance with 10 CFR 50.30, Florida Power & Light Company submits herewith three (3) signed originals and forty (40) copies of a request to amend Appendix A of Facility Operating Licenses DPR-31 and DPR-41.

This amendment is submitted in response to your letter dated June 11, 1980, requesting that the Technical Specifications be modified to provide for redundancy in decay heat removal systems for all modes of reactor operation.

The proposed amendment is attached to this letter and includes the accompanying Technical Specification pages bearing the date of this letter in the lower right hand corner. In developing the proposed amendment we adapted the STS wording to the format of the existing Turkey Point Technical Specifications.

The proposed amendment has been reviewed by the Turkey Point Plant Nuclear Safety Committee and the Florida Power & Light Company Nuclear Review Board. They have concluded that it does not involve an unreviewed safety question.

Very truly yours,

Robert E. Uhrig
Vice President
Advanced Systems & Technology

Re: Turkey Point Units 3 and 4
Docket No. 50-250 and 50-251
Proposed Amendment to Facility
Operating Licenses DPR-31 and DPR-41

PROPOSED CHANGES

Page 1-6

Add definition of Coolant Loop.

Pages 3.4-2a, 3.4-3

Delete paragraphs 3.4.1.b.4 through 3.4.1.b.6. Add paragraphs to require redundant Coolant Loops to be operable or operating in each mode of reactor operation.

Table 4.1-2

Add additional surveillance items to ensure the operability of RHR and RCS components.

Page B3.1-1 and B3.1-1a

Change to include additional bases for redundancy in the RC and RHR systems.
