EXPERIENCE

Tracerco

Newark, DE

Project Engineer

Sep 2011-Present

- Determine type and chemical form of tracer isotope for any process application and perform tracer dilution and injections of gas, solids, and liquids
- Utilized tracer measurement technology to diagnose process performance and integrity of internals in chemical plant and refinery process equipment including distillation towers, heat exchangers, reactors, piping systems, and FCC units
- Calculate the source sizes necessary for sealed source projects
- Performed scans of distillation columns, reactors, and heat exchangers to determine equipment performance and the integrity of internals
- Inspected undersea pipelines to detect obstructions and ensure proper operation
- Performed flooded member inspections on offshore oil platforms
- Analyze data and write preliminary and final reports for tower scans, neutron backscatter scans, flooded member inspections, separator studies, and tracer studies
