Vice President, Advanced
Systems & Technology
Florida Power & Light Company
P.O. Box 529100
Miami, FL 33152

Dear Mr. Uhrig:

SUBJECT: NRC ACCEPTANCE OF REVISED FLORIDA POWER & LIGHT COMPANY'S QUALITY ASSURANCE TOPICAL REPORT

The Uhrig/Haass letter of April 3, 1981 submitted Revision 4 to Florida Power & Light Company's (FP&L) topical report, FPLTQAR 1-76A, "Topical Quality Assurance Report," for staff review and approval. Revision 4 revises the topical report to reflect organizational changes, commitments to regulatory guides, and editorial changes.

Based on our evaluation of the proposed changes described in Revision 4, we find that your revised topical report continues to meet the criteria of Appendix B to 10 CFR Part 50. Therefore, your revised topical report is acceptable, and you may implement it upon issuance of the revision. We do not intend to repeat our review of this topical report when it is referenced in an application unless changes occur in our acceptance criteria.

To use the topical report in future license applications, FP&L need only reference this topical report in Section 17 of the Safety Analysis Report. In addition, this QA program may be implemented immediately on all ongoing activities. In this regard, identify in your transmittal letter those nuclear power plants that will be covered by Revision 4 to FPLTQAR 1-76A.

Should regulatory criteria or regulations change such that our conclusions about this topical report are invalidated, we will notify you. You will be given the opportunity to revise and resubmit it should you so desire. Programmatic changes by FP&L to this topical report are to be submitted to NRC for review prior to implementation. Organizational changes are to be submitted no later than 30 days after announcement.

Please replace our letter of September 8, 1977 and the enclosure to the July 2, 1976 letter which was the staff's evaluation of the report through Revision 0, with a copy of this letter and the enclosed topical report evaluation in your report, renumber the report FPLTQAR 1-76A, Revision 4 and resubmit 36 copies.

Should you have any questions regarding our review or if we can provide assistance, please feel free to contact Mr. James Conway on (301) 492-7741.

Sincerely,

Walter P. Haass, Chief
Quality Assurance Branch
Division of Engineering
