Dear Sirs:

I have been informed that the Atomic Safety and Licensing Board will be holding hearings regarding, among other things, health, safety and economic feasibility or non-feasibility of steam generator repair to units at Turkey Point. It is my understanding that these hearings have been requested by citizen intervener Mark Oncavage, and that they will take place in June.

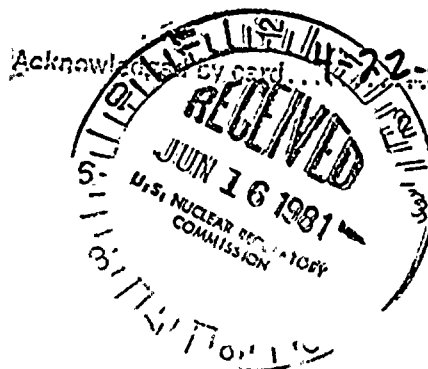

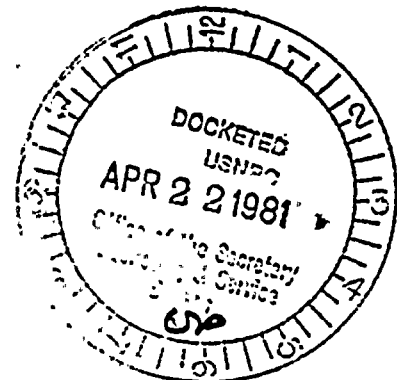

I would like to request the opportunity to make a statement at those hearings.

Please inform me of the exact date, time and location of the hearings, and the amount of time that can be reserved, hopefully.

Sincerely,

Joel C. Lewis
