Office of Nuclear Reactor Regulation
Attention: Mr. S. A. Varga, Chief
Operating Reactors Branch #1
Division of Operating Reactors
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. Varga:

Re: Turkey Point Units 3 & 4
Docket Nos. 50-250 & 50-251
Post-TMI Requirements
Safety & Relief Valve Testing

By letter dated July 1, 1981 R.C. Youngdahl (Consumers Power) transmitted the Interim Data Report for the EPRI PWR safety and Relief Valve Test Program. This report summarizes the test data collected to date on relief valves (safety valve data is still not available). Our Turkey Point Plants have a Copes-Vulcan D-100-160 relief valve and a Crosby model HB-BP-86 safety valve. Relief and safety valves representative of the above valves are being tested in the EPRI program. Florida Power and Light will submit evaluations and other plant specific data on a schedule consistent with the R. C. Youngdahl letter of December 15, 1980 and modified on July 1, 1981.

Very truly yours,

Robert E. Uhrig
Vice President
Advanced Systems & Technology

REU/JEM/ras
