Gentlemen:

SUBJECT: Report Nos. 50-250/81-01 and 50-251/81-01

This refers to the inspection conducted by W. C. Marsh of this office on January 29, 1981, of activities authorized by NRC Operating License Nos. DPR-31 and DPR-41 for the Turkey Point facility. Our preliminary findings were discussed with H. E. Yaeger at the conclusion of the inspection.

This inspection was an examination of the activities conducted under your license as they related to manning of the control room and to compliance with the Commission's rules and regulations and the conditions of your license. The inspection consisted of observations of Turkey Point Unit 3 and 4 control room manning during power operation.

During the inspection, it was found that certain activities under your license appear to violate NRC requirements. This item is addressed in enforcement correspondence to you from Victor Stello, Jr., Director, Office of Inspection and Enforcement, dated February 18, 1981.

In accordance with Section 2.790 of the NRC "Rules of Practice," Part 2, Title 10, Code of Federal Regulations, a copy of this letter and the enclosed inspection report will be placed in the NRC Public Document Room. If this report contains any information that you believe to be proprietary, it is necessary that you make a written application within 20 days to this office to withhold such information from public disclosure. Any such application must include the basis for claiming that the information is proprietary and the proprietary information should be contained in a separate part of the document. If we do not hear from you in this regard within the specified period, the report will be placed in the Public Document Room.

Should you have any questions concerning this letter, we will be glad to discuss them with you.

Sincerely,

R. C. Lewis

Richard C. Lewis, Acting Director
Resident & Reactor Project Inspection
