

APPENDIX A

NOTICE OF VIOLATION

Florida Power and Light  
Turkey Point

Docket No. 50-250  
License No. DPR-31

As a result of the inspection conducted on April 25, - May 25, 1981, and in accordance with the Interim Enforcement Policy, 45 FR 66754 (October 7, 1980), the following violation was identified.

Technical Specification 6.8.1 requires implementation of written procedures and administrative policies that meet or exceed the requirement and recommendations of section 5.1 of ANSI 18.7-1972 and USNRC Regulatory Guide 1.33. Administrative Procedure 0103.11, Housekeeping, requires that following maintenance under their cognizance, a supervisor or foreman will verify that the work site is clean and that all trash and debris has been removed from the area.

Contrary to the above, during facility tours of units 3 and 4 this inspection period, it was noted that maintenance supervisors failed to implement existing procedures to verify post maintenance cleanliness in that:

1. Debris consisting of several pieces of a replaced waste Gas Compressor were left on the floor of the Auxiliary Building hallway at the four foot elevation for several months after completion of the replacement compressor installation (December 1980 - April 1981), and
2. The defective valve 4-895L and an attached length of contaminated tygon tubing were left on the floor of the Unit 4 spray pump room for several months after the replacement of the valve (May 1980 - April 1981).

This is a Severity Level V Violation (Supplement I.F.).

Pursuant to the provisions of 10 CFR 2.201, you are hereby required to submit to this office within thirty days of the date of this Notice, a written statement or explanation in reply, including: (1) admission or denial of the alleged violations; (2) the reasons for the violations if admitted; (3) the corrective steps which have been taken and the results achieved; (4) corrective steps which will be taken to avoid further violations; and (5) the date when full compliance will be achieved. Consideration may be given to extending your response time for good cause shown. Under the authority of Section 182 of the Atomic Energy Act of 1954, as amended, this response shall be submitted under oath or affirmation.
