Docket No. 50-251

Ms. Joette Lorion
Center for Nuclear Responsibility
7210 Red Road
Room 208
South Miami, Florida 33143

Dear Ms. Lorion:

This is in response to your letter dated September 11, 1981, which you wrote out of concern about the Turkey Point Plant Unit No. 4 in which you requested that the Nuclear Regulatory Commission take steps to immediately initiate a license review of this nuclear reactor unit, that the NRC request that Turkey Point Unit No. 4 shut down immediately for its already delayed steam generator inspection and that the NRC consider the suspension of the license for Turkey Point Unit No. 4 until such time as Florida Power and Light Company submits proof that this reactor unit's pressure vessel would maintain its integrity in a loss of cooling accident.

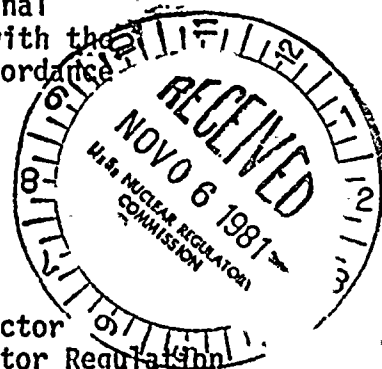

For the reasons set forth in the enclosed response to your letter, your requests are hereby denied.

A copy of this determination will be placed in the Commission's public Document Room at 1717 H Street, N. W., Washington, D. C. 20555 and at the Environmental and Urban Affairs Library, Florida International University, Miami, Florida 33197. A copy will also be filed with the Office of the Secretary of the Commission for its review in accordance with 10 CFR 52.206(c) of the Commission's regulations.

Sincerely,

Original Signed by
H. R. Denton

Harold R. Denton, Director
Office of Nuclear Reactor Regulation
