Office of Nuclear Reactor Regulation  
Attention: Mr. Darrell G. Eisenhut, Director  
Division of Licensing  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Dear Mr. Eisenhut:

Re: Turkey Point Units 3 & 4  
Docket No. 50-250 and 50-251  
Proposed License Amendment  
Auxiliary Feedwater System

In accordance with 10 CFR 50.30, Florida Power & Light Company submits herewith three signed originals and forty copies of a request to amend Appendix A of Facility Operating Licenses DPR-31 and DPR-41.

This amendment is submitted in response to a NRC letter dated December 24, 1981 which requested that we propose a Technical Specification change to require that a dedicated individual in communication with the control room be stationed at the Auxiliary Feedwater area when valves are manually realigned.

The proposed amendment is described below and shown on the accompanying Technical Specification pages bearing the date of this letter in the lower right hand corner.

Technical Specification 4.10, Page 4.10-1

This specification is changed to add the requirement mentioned above.

The proposed amendment has been reviewed and approved by the Turkey Point Plant Nuclear Safety Committee and the Florida Power & Light Company Nuclear Review Board.

Very truly yours,

*Robert E. Uhrig*
