TOTAL NUMBER OF COPIES REQUIRED: LTR 43 ENCL 40

1. The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that this is crucial for ensuring the integrity of the financial statements and for providing a clear audit trail.

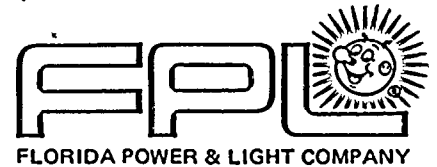

2. The second part of the document outlines the various methods used to collect and analyze data. It includes a detailed description of the sampling techniques employed and the statistical tests used to evaluate the results.

3. The third part of the document provides a comprehensive overview of the findings of the study. It discusses the implications of the results and offers recommendations for future research and practice.

4. The fourth part of the document concludes the study and summarizes the key findings. It reiterates the importance of the research and the need for continued efforts to improve the accuracy and reliability of financial reporting.

5. The fifth part of the document includes a list of references and a list of figures. The references cite the various sources used in the study, and the figures provide a visual representation of the data.

Dear Mr. Eisenhut:

Re: St. Lucie Unit 1  
Turkey Point Units 3 & 4  
Docket Nos. 50-335, 50-250, 50-251  
Appendix R Fire Protection Submittal Dates

This letter is in follow-up to our meeting in your office on May 18, 1982 to discuss the recently mandated July 1, 1982 Appendix R fire protection submittal dates.

As we discussed, Florida Power & Light is making every effort to provide the St. Lucie Unit 1 Appendix R fire protection submittal before July 1, 1982 in order to provide NRC staff additional review lead time prior to the inrush of industry submittals on July 1st. Since some of the St. Lucie Unit 1 report sections and appendices are similar to those that will be provided in the Turkey Point Unit 3 & 4 submittal, we hope that early submittal of St. Lucie Unit 1 will also help the Turkey Point Unit 3 & 4 staff reviewers.

As we further indicated in our meeting, we are very concerned about the effect of the rescheduling on the Turkey Point Unit 3 & 4 submittal which compressed the original FPL projected completion date of November 9, 1982 back to July 1, 1982. To accomplish this, FPL has shifted many key personnel from other assignments to this job and we will make every possible effort to make this revised/optimum schedule date. Unfortunately, this schedule is so compressed that untimely completion of any of the numerous milestones (by outside contractors or internal to FPL) will compound delay of the final submittal date. We will continue to keep the project managers apprised of the schedule status on a weekly basis.

We want to thank you for the opportunity of discussing these matters with you and hope that these schedules and all other fire protection issues will soon be agreed upon and resolved.

Very truly yours,

J.E. Vessely  
Director of Nuclear Affairs

JEV/JNB/paf
