Mr. Harold R. Denton, Director  
Office of Nuclear Reactor Regulation  
U. S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Dear Mr. Denton:

RE: Turkey Point Units 3 & 4  
Docket Nos. 50-250, 50-251  
FSAR Update

Florida Power & Light has completed an update of the Turkey Point Units 3 & 4 Final Safety Analysis Report in accordance with 20 CFR 50.71(e). The required thirteen copies of the updated Report are being submitted separately...

Due to the large amount of changes which have occurred during the ten years of plant operation, there are several changes which still require verification. These consist of changes to the description of the Waste Disposal System, and verification should be complete by August 30, 1982.

Paragraph (2) of the above regulation requires an identification of changes made under the provisions of 10 CFR 50.59 but not previously reported to the Commission. In the "questions and answers" section of the NRC Generic Letter 81-06 dated February 26, 1981, the staff indicated that this first submittal should be a "clean" document without identification of changes. Following this guidance, we have not marked the changes made in accordance with 10 CFR 50.59.

Florida Power & Light submits changes made under the provisions of 50.59 in an annual submittal covering the period of July 1 of one year to June 30 of the next. Descriptions of the plant changes/modifications which were completed prior to June 30, 1981, were submitted to the Commission in these annual submittals. This year's report, covering the period from July 1, 1981 through June 30, 1982 is scheduled to be submitted by September 1, 1982. In order to avoid duplicate reporting for this first update, we intend to meet the FSAR update requirement for change identification by means of this annual 50.59 submittal.

- It should be noted that all plant change/modifications made to Turkey Point Units 3 & 4 as of the cut off date of January 22, 1982, have been included in the FSAR update.

Very truly yours,

Robert E. Uhrig  
Vice President  
Advanced Systems & Technology
