

AUG 16 1982

Docket No. 50-250  
and 50-251

Florida Power & Light Company  
ATTN: Dr. Robert E. Uhrig  
Vice President  
Advanced Systems and Technology  
Post Office Box 529100  
Miami, Florida 33152

Gentlemen:

On July 30, 1982, the Division of Licensing (DL) staff completed their review of your application dated December 30, 1980 and issued Amendment Nos. 87 and 81 to Facility Operating License Nos. DPR-31 and DPR-41, respectively. This application proposed certain Technical Specification changes related to redundancy in the residual heat removal system for Turkey Point Plant Units Nos. 3 and 4 in response to a DL letter dated June 11, 1980. Fees pursuant to 10 CFR 170.22 were not remitted with your application.

Based on information provided by the DL staff as the result of their final review of your application, it has been determined that a Class III fee (\$4,000) and a Class I fee (\$400) are appropriate for this application since the review involved consideration of a single safety issue and a duplicate unit. Therefore, you should remit the sum of \$4,400 to this office.

Although your December 30 application was requested by the USNRC, it is not exempt from fees under the provision of Footnote 2. When applications such as this one are requested by the USNRC for the purpose of enhancing the safe operation of a nuclear facility or to correct a problem or potential problem relating to operation of a facility, they are not exempt under Footnote 2 unless specifically ordered pursuant to 10 CFR 2.204.

Sincerely,

Original Signed by:  
Reba M. Diggs
