FLORIDA POWER & LIGHT COMPANY

September 10, 1982
L-82-403

Office of Nuclear Reactor Regulation
Attention: Mr. Darrell G. Eisenhut, Director
Division of Licensing
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Eisenhut:

Re: Turkey Point Units 3 & 4
Docket No. 50-250 & 251
Proposed License Amendment
Radiological Effluent Technical Specifications
& Offsite Dose Calculation Manual

In accordance with 10 CFR 50.90, Florida Power & Light Company submits herewith three signed originals and forty copies of a request to amend Appendix A of Facility Operating License DPR-31 and 41.

Florida Power & Light submitted proposed amendments to Appendix A of the Turkey Point Technical Specifications on April 17, 1979 (L-79-92). The proposed amendments were for changes to the Radiological Effluent Technical Specifications (RETS) pursuant to NUREG 0472. The attached is the results of our recent review and updating of that submittal.

This proposed amendment and Offsite Dose Calculation Manual is submitted with the understanding that some additional changes may be forthcoming following discussions with the NRC regarding the St. Lucie Unit 2 RETS. It should also be noted that we require a sufficient amount of time between approval of the amendment and implementation of its requirements. This time is necessary to allow for procedure writing and personnel training.

It has been determined that this represents a Class 1 and III amendment. A check for \$4400 in accordance with 10 CFR 170.22 will follow under separate cover.

The proposed amendment has been reviewed by the Turkey Point Plant Nuclear Safety Committee and the Florida Power & Light Company Nuclear Review Board.

Very truly yours,

Robert E. Uhrig
Vice President
Advanced Systems & Technology
