L-83-23

Office of Nuclear Reactor Regulations
 Attention: Mr. Steven A. Varga, Chief
 Operating Reactors Branch No. 1
 Division of Licensing
 U.S. Nuclear Regulatory Commission
 Washington, D. C. 20555

Dear Mr. Varga:

Re: Turkey Point Units No. 3 & 4
 Docket Nos. 50-250 and 50-251
Environmental Qualification of Electrical Equipment

In an effort to provide you with a thorough review of the proprietary information contained in the technical evaluation reports attached to your December 13, 1982 letter, we are investigating what the shortest time interval this review will take. We expect that this schedule will be finalized and forwarded to you on or about February 28, 1983.

As we have identified verbally to your Mr. D. McDonald, this review will necessitate contacting each vendor that has provided data in our original submittal and have them provide certification of the proprietary nature of the information identified in your technical evaluation report.

Until this certification is obtained, we strongly urge that the information in the technical evaluation reports not be publicly disclosed for this disclosure would cause serious contractual difficulties between FPL and our vendors.

Your cooperation is greatly requested.

Very truly yours,

Robert E. Uhrig
 Vice President
 Advanced Systems & Technology
