* This entity is a municipal or state government organization. Ownership of bonds or other financial instruments issued by such an organization is proscribed only when the bonds or other financial instruments are issued specifically for the construction of nuclear power plants.

** This entity has been added by this issuance.

*** This list is compiled based on a recent Office of the General Counsel review of energy and utility

mutual fund reports and prospectuses which show that at least 25% of the assets of each fund are entities in the first four categories of this list. Because the holdings of a fund change, employees should contact OGC if a fund listed above holds less than 25% of its assets in prohibited securities. In addition to these NRC-specific limitations, the government-wide restrictions remain on participation in a particular matter by an employee owning more than \$15,000 of any sector fund where the participation could directly and predictably affect the financial interests of any entity in that particular sector fund. Where the matter is a generic one (such as rulemakings) employees can participate if they do not own more than \$50,000 in the affected sector mutual fund.
