Office of Nuclear Reactor Regulation
Attention: Mr. D. G. McDonald, Project Manager
PWR Project Directorate #2
Division of PWR Licensing - A
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. McDonald:

Re: Turkey Point Units 3 and 4
Docket Nos. 50-250 and 50-251
Generic Letter 86-04

By letter dated February 13, 1986 (Generic Letter 86-04), the NRC Office of Nuclear Reactor Regulation requested certain information regarding the Florida Power & Light Company (FPL) program for providing engineering expertise on shift at the Turkey Point Plant.

The following information is provided in response to Generic Letter 86-04:

1. The current FPL program for providing engineering expertise on shift is consistent with Option 2 in the October 28, 1985 Federal Register Notice (50 FR 43621) containing the Commission Policy Statement on Engineering Expertise On Shift.
2. Our current STA program meets the criteria of NUREG-0737, Item I.A.1.1 as specified in Option 2 of the Policy Statement.
3. Although we are continuing to evaluate the combined SRO/STA concept, we have no plans to change our current STA program.

Very truly yours,

C. O. Woody
