DEC 06 2017

John S. To, M.D.
Radiation Safety Officer
Dickinson County Memorial Hospital
1721 South Stephenson Avenue
Iron Mountain, MI 49801

Dear Dr. To:

Enclosed is Amendment No. 36 to your NRC Material License No. 21-18889-01 in accordance with your request.

If you have any questions or comments concerning this amendment, please contact me at either (630) 829-9841 or (800) 522-3025, ext. 9841. My fax number is 630-515-1078.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

Please note that we revised the authorizations in Condition No. 12.B. for you and Dr. Louis J. Mautone. It appears that the format for your authorizations for sodium iodide iodine-131 was incorrect in that the authorizations permitted "quantities less than or equal to 33 millicuries only for oral administration for imaging and localization studies." These authorizations now read correctly as "...35.300 (limited to the oral administration of sodium iodide iodine-131 for diagnostic studies)."

The revised and corrected authorizations were taken from the bottom of the table on our Medical Licensing Toolkit webpage at:
<https://www.nrc.gov/materials/miau/35.300-authorizations.pdf>

If you have any questions concerning these changes, which should not have an effect on your actual use of this material, please contact me at (630)-829-9841. My fax number is (630)-515-1078 and my email address is colleen.casey@nrc.gov.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you.

This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions.

Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture.

You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>.

We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

Sincerely,

Colleen Carol Casey
Materials Licensing Branch
