Gentlemen:

SUBJECT: NOTICE OF VIOLATION  
(NRC INSPECTION REPORT NOS. 50-250/87-36 AND 50-251/87-36)

This refers to the Nuclear Regulatory Commission (NRC) inspection conducted by G. B. Kuzu on August 24-28, 1987. The inspection included a review of activities authorized for your Turkey Point facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed inspection report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress.

The inspection findings indicate that certain activities appeared to violate NRC requirements. The violations, references to pertinent requirements, and elements to be included in your response are described in the enclosed Notice of Violation.

The first violation described in the enclosed Notice is similar to a violation contained in the Notice sent to you by our letter dated April 28, 1987. Because "similar violations," as described in the NRC Enforcement Policy, are of significant concern to the NRC, please give particular attention in your response to the identification of the root cause of this problem and your corrective action to prevent recurrence.

In addition, the inspection revealed that full corrective actions on previous violations (50-250/87-15-01, 251/87-15-01) had not been completed. In your reply to the Notice of Violation referenced above you should indicate what actions you have taken to correct this matter and steps taken to prevent recurrence.
