Chairman of the Board  
Florida Power and Light Company  
Post Office Box 14000  
Juno Beach, Florida 33408

JUL 8 1988

50-250/251

Dear Mr. Hudiburg:

On June 28 and 29, 1988, NRC senior managers met to review the performance of operating nuclear power plants licensed by the NRC. These meetings are conducted biannually to focus NRC resources on those plants and issues of greatest safety significance. At this meeting, the Turkey Point facility was categorized as requiring continued close monitoring. Plants in this category have been identified as having weaknesses that warrant increased NRC attention from both headquarters and the regional office.

A summary of NRC discussions held relating to Turkey Point is provided below:

Since last August, FP&L has taken significant actions to improve management of Turkey Point. As of now, they have made management changes in numbers of key positions including the Executive Vice President. In addition, FP&L has committed to submit by mid-August their response to ENERCON's independent management appraisal, which is expected to include additional actions deemed necessary for improving performance. NRC will continue to closely monitor performance at Turkey Point to gauge the effectiveness of the licensees actions.

An NRC Commission meeting open to the public has been scheduled for July 13, 1988, to review the results of the latest meeting of NRC managers. Dr. J. Nelson Grace, the Region II Administrator, has discussed the basis for our conclusions with regard to the Turkey Point facility with members of your staff.

If you have any questions regarding this matter, do not hesitate to call me.

Sincerely,

Original signed by  
Victor Stello
