

SEP 01 1988

Florida Power and Light Company  
ATTN: Mr. W. F. Conway  
Senior Vice President - Nuclear  
P. O. Box 14000  
Juno Beach, FL 33408-0420

Gentlemen:

Enclosed is the Summary of the NRC Office of Investigations Report Q2-87-018 which was issued March 7, 1988. The investigation examined the facts and circumstances involved in the alleged drug abuse by certain personnel at the Turkey Point Nuclear Station (TPNS). The investigation concluded that none of the individuals named by the alieger were licensed at Turkey Point and that your drug testing program revealed that none of the alleged users showed any evidence of drug or narcotic use.

This concludes our review of this matter.

Sincerely,

Original signed by  
J. Philip Stohr (for)  
J. Nelson Grace

## SUMMARY

This inquiry was initiated by the U.S. Nuclear Regulatory Commission's (NRC) Office of Investigation (OI), with the knowledge of the NRC Region II staff, to interview an alleged who reported cocaine use by licensed personnel at Florida Power and Light Company's (FP&L), the licensee, Turkey Point Nuclear Station (TPNS), Florida City, Florida. The alleged, not a licensee employee, telephonically contacted the NRC Headquarters and Region II Duty Officers on December 7, 1987, and reported cocaine use by specific TPNS employees, including the alleged's former girlfriend and NRC licensed operators. Subsequent inquiries revealed that none of the individuals identified by the alleged are currently licensed by the NRC at the TPNS facility.

On December 8, 1987, the licensee was requested to perform urine drug testing on all the TPNS employees identified by the alleged. The alleged was also telephonically contacted on this date by an OI representative at which time he agreed to a personal interview regarding his disclosures of cocaine use by licensee personnel. During the initial telephone interview, the alleged acknowledged that his former girlfriend had failed to repay a loan and that vengeance against this individual was one motive for reporting her aberrant drug behavior to the NRC.-

During the subsequent personal interview on December 9, 1987, the alleged advised that he no longer desired to discuss his allegations of drug use by licensee personnel. He related that he was personally unaware of drug use by any licensee employee, except his former girlfriend, but said she had told him the licensee individuals he identified to the NRC also use this substance. After the personal interview was concluded, the alleged telephonically contacted the reporting investigator two times at the Miami, Florida motel and related his brother had physically beaten him for reporting drug use by TPNS personnel to the NRC and his mother had discouraged further contacts with the agency because of feared libel reprisals by the alleged users. Although the alleged promised to report additional information to the reporting investigator, several attempts to re-contact him have not been productive.

Following the interviews with the alleged the licensee was contacted and reported that the licensee employees who were drug tested, including all personnel identified to the NRC by the alleged, disclosed no evidence of drug or narcotics use. At the completion of this inquiry, representatives of the U.S. Drug Enforcement Administration and the Metro-Dade Police Department, Miami, Florida were apprised of the alleged's disclosures to the NRC.
