Florida Power and Light Company
ATTN: Mr. W. F. Conway
Senior Vice President - Nuclear
P. O. Box 14000
Juno Beach, FL 33408-0420

Gentlemen:

SUBJECT: NRC INSPECTION REPORT NOS. 50-250/88-22 AND 50-251/88-22

This refers to the Nuclear Regulatory Commission (NRC) inspection conducted by William P. Kleinsorge, P.E. on August 8-12, 1988. The inspection included a review of activities authorized for your Turkey Point facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed inspection report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress.

Within the scope of the inspection, no violations or deviations were identified.

Your letters of response dated April 5, 1985, December 6, 1985, and May 2, 1986, in regard to a violation relating to failure to test fail safe valves in accordance with the Code, although accurate at the time of their submittal, have now been noted to be inaccurate. It is our understanding that you will provide this office an amended response within 30 days of the completion of this inspection (September 11, 1988).

Your letters of response dated May 15, 1986 and May 29, 1986, in regard to a violation relating to failure to provide appropriate acceptance criteria for inservice testing procedure did not concur with the violation. We have examined the basis for your denial and have determined that the violation stands. It is our understanding that you will provide this office an amended response within 30 days of the completion of this inspection (September 11, 1988).

In accordance with Section 2.790 of the NRC's "Rules of Practice," Part 2, Title 10, Code of Federal Regulations, a copy of this letter and its enclosure will be placed in the NRC Public Document Room.
