Gentlemen:

SUBJECT: NRC INSPECTION REPORT NOS. 50-250/89-08 AND 50-251/89-08

This refers to the Nuclear Regulatory Commission (NRC) inspection conducted by A. L. Cunningham on March 13-17, 1989. The inspection included a review of activities authorized for your Turkey Point facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed inspection report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress.

The inspection findings indicate that certain activities appeared to violate NRC requirements. However, a Notice of Violation is not being issued based on your prompt initiation and completion of corrective actions; therefore, no response is required.

In accordance with Section 2.790 of the NRC's "Rules of Practice," Part 2, Title 10, Code of Federal Regulations, a copy of this letter and its enclosure will be placed in the NRC Public Document Room.

Should you have any questions concerning this letter, please contact us.

Sincerely,

Original Signed By  
D. M. Collins

Douglas M. Collins, Chief  
Emergency Preparedness and  
Radiological Protection Branch  
Division of Radiation Safety  
and Safeguards
