Office of Nuclear Reactor Regulation
Attention: Mr. Darrell G. Eisenhut, Director
Division of Licensing
U. S. Nuclear Regulatory Commission
Washington, D. C. 20550

Dear Mr. Eisenhut:

Re: Turkey Point Units 3 & 4
Docket No. 50-250 & 50-251
Supplement 1 to NUREG 0737
(Generic Letter 82-33) -
Emergency Offsite Facility.

Our letter L-83-237 dated April 15, 1983 transmitted our response to Supplement 1 of NUREG 0737. We noted in that response that we were unable to provide an operability date for the Emergency Offsite Facility (EOF) prior to NRC approval of our request to locate the EOF greater than 20 miles from the plant site. We have subsequently received your letter dated April 29, 1983 granting that approval.

Therefore, we are able to state that the Turkey Point Unit 3 & 4 EOF is operational, with the following exceptions:

- 1) Plant procedure 1212, "Activation and Use of the EOF (Turkey Point)" must be revised and reissued. This will be complete by June 1, 1983.
- 2) In accordance with NRC direction on EOFs greater than 20 miles from the site, we have provided working space for the NRC at the site. Communications between this facility, the Nearsite Support Center (NSC), and the EOF are available by Southern Bell phone lines. However, dedicated phone lines at the NSC and the EOF for the Emergency Notification System (ENS) and the Health Physics Network (HPN) must be ordered by the NRC. The installation and our operational commitments for the ENS and HPN are dependent upon NRC action in this area.

Very truly yours,

Robert E. Uhrig
Vice President
Advanced Systems & Technology
