Office of Nuclear Reactor Regulation  
Attention: Mr. Darrell G. Eisenhut, Director  
Division of Licensing  
U. S. Nuclear Regulatory Commission  
Washington, D. C. 20555

Dear Mr. Eisenhut:

Re: Turkey Point Units 3 & 4  
St. Lucie Units 1 & 2  
Docket Nos. 50-250, 50-251  
50-335, 50-389  
Generic Letter 83-28

Florida Power & Light has reviewed Generic Letter 83-28 (Required Actions Based on Generic Implications of Salem ATWS Events) as it applies to Turkey Point Units 3 and 4 and St. Lucie Units 1 and 2. As FPL is a member of the Westinghouse Owners Group and a member of the Combustion Engineering Owners Group, we plan to use information expected to be developed by these groups to respond to portions of the following sections of the Generic Letter:

- 2.1 Equipment Classification and Vendor Interface (Reactor Trip System Components)
- 4.2 Reactor Trip System Reliability (Preventive Maintenance and Surveillance Program for Reactor Trip Breakers)
- 4.3 Reactor Trip System Reliability (Automatic Actuation of Shunt Trip Attachment for Westinghouse and B&W Plants)
- 4.5 Reactor Trip System Reliability (System Functional Testing)

The Owners Groups are scheduled to meet this month and we expect that schedular information on the above items will be available after the meetings. Should the developed schedules extend past the current submittal date for the Generic Letter, we will provide the extension information requested in the letter.
