Clinch River Nuclear Site
NRC Docket No. 52-047

Subject: Submittal of Coincident Wet-Bulb Data and Spreadsheet Files in Support of
Early Site Permit Application for Clinch River Nuclear Site

Reference: Letter from TVA to NRC, CNL-16-081, "Application for Early Site Permit for
Clinch River Nuclear Site," dated May 12, 2016

In the referenced letter, Tennessee Valley Authority (TVA) submitted an application for an early site permit for the Clinch River Nuclear Site in Oak Ridge, TN. During an NRC public meeting held on August 30, 2017, the staff requested that TVA provide supplemental information related to the evaluation of the 100-year return coincident wet bulb temperature for the Clinch River Nuclear Site. The enclosed files contain input data and spreadsheet calculations that support TVA's evaluation of the 100-year return coincident wet bulb temperature for the Clinch River Nuclear Site.

There are no new regulatory commitments associated with this submittal. If any additional information is needed, please contact Dan Stout at (423) 751-7642.

I declare under penalty of perjury that the foregoing is true and correct. Executed on this 7th day of September 2017.

Respectfully,

J. W. Shea
Vice President, Nuclear Regulatory Affairs & Support Services
