Subject: RE: Draft RAI pertaining evacuation time estimates in Section 13.03 of TVA application

Ray,

Based on discussions with the technical team, I would like to provide the following response to the three questions:

1. A clarification call is needed to clarify any of portion of the RAIs;

At this time, TVA does not see the need to have a clarification discussion for the RAIs.

2. TVA identifies any proprietary information or security-related information (SRI) located in the question(s);

TVA did not identify any proprietary or security-related information in the RAIs.

3. TVA is able to respond to the RAI within 30 days.

TVA is able to respond to RAI questions 1, 3 through 11 within 30 days. However, our initial estimate for question #2 response is that it will require greater than 30 days.

Our technical staff is working on understanding the scope of this question. A better estimate of the time required to respond to this RAI question is expected within the next week.

Please let me know if you have any questions.

Thanks

Archie Manoharan

Subject: Draft RAI pertaining evacuation time estimates in Section 13.03 of TVA application

TVA External Message. Please use caution when opening.

Good Morning,

Attached is the draft RAI pertaining to evacuation time estimates in Section 13.03 of your application, (RAI Number-08, eRAI-9029) for the Clinch River Nuclear Site ESP application review.

TVA has ten working days to review the draft RAI and respond to the following:

1. A clarification call is needed to clarify any of portion of the RAIs;
2. TVA identifies any proprietary information or security-related information (SRI) located in the question(s);
3. TVA is able to respond to the RAI within 30 days.

After the call, or after ten days, NRC will finish processing the RAI through the eRAI system and issue the RAI as final to TVA. Subsequent to receipt of the final RAI, TVA will have 30 calendar days to respond to the RAIs unless additional time is specifically requested.

Please let me know if you have any questions.

Thanks

Mallecia
