1. The purpose of this document is to provide a comprehensive overview of the current status of the project and to identify the key areas that require attention.

2. The project has made significant progress since the last meeting, with most of the initial objectives being met. However, there are still several critical areas that need to be addressed.

3. The following table provides a detailed breakdown of the project's performance across various key performance indicators (KPIs).

4. It is important to note that the data presented in the table is preliminary and subject to change as more information becomes available.

Category	Target	Actual	Variance	Notes
Project Progress	85%	78%	-7%	Delayed due to resource constraints.
Budget Adherence	95%	92%	-3%	Minor overspend on materials.
Quality Control	98%	99%	+1%	Exceeded expectations.
Customer Satisfaction	90%	88%	-2%	Feedback loop initiated.
Team Performance	92%	91%	-1%	High morale and productivity.

Re: Turkey Point Units 3 and 4
Docket Nos. 50-250 and 50-251
Special Report - Breached Fire Barriers

Purpose:

Technical Specification 3.14.5.b requires the submission of a report to the NRC if a non-functional fire barrier penetration is not returned to functional status within 7 days. In accordance with the above requirement, this special report on the breached barriers is being generated in order to notify the NRC. This special report will be updated on a 30 day basis until the Appendix R associated work is complete.

Event:

The plant has been and is continuing to implement numerous modifications, mainly in accordance with Appendix R Alternate Shutdown requirements. The schedular exemptions for the Safe Shutdown modifications, which outlined the alternative compensatory measure to be taken when a barrier is breached, expired on September 30, 1986, and on October 1, 1986. Upon the expiration of the exemptions, the compensatory measures as described in Attachment of our letter L-85-386 (dated October 11, 1985), are continuing to be in place until the Safe Shutdown modifications are complete. Breaches incurred during Alternate Shutdown modifications are governed by the Technical Specifications or the exemptions as applicable.

Cause and Corrective Actions:

The major cause of the breached barriers is the Appendix R Alternative Shutdown work which still remains to be completed. Due to the large volume of work being performed, the plant is reporting the breaches in this one report, rather than on a case-by-case basis. The breaches are grouped in two categories (see attached list of breached barriers):

- 1) those breaches which are now closed, but were open for longer than 7 days, and
- 2) those breaches which were open at the end of December, and were open for longer than 7 days.

The plant continues to implement the compensatory measures as applicable.

Very truly yours,
[Signature]
