Juno Beach, FL 33408

Gentlemen:

SUBJECT: NOTICE OF VIOLATION
(NRC INSPECTION REPORT NOS. 50-250/87-14 AND 50-251/87-14)

This refers to the Nuclear Regulatory Commission (NRC) inspection conducted by D. R. Brewer on March 9 - April 27, 1987. The inspection included a review of activities authorized for your Turkey Point facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed inspection report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selected examinations of procedures and representative records, interviews with personnel, and observation of activities in progress.

The inspection findings indicate that certain activities appeared to violate NRC requirements. The violation, references to pertinent requirements, and elements to be included in your response are described in the enclosed Notice of Violation.

The violations described in paragraphs 8a, 8b, and 9a in the enclosed inspection report are currently under consideration for escalated enforcement action. Accordingly, no Notice of Violation is being issued at this time, and no response to these violations are required. However, please be advised that the number and characterization of violations described in the enclosed inspection report may change as a result of further NRC review. You will be advised by separate correspondence of the results of our deliberations on this matter.

In accordance with Section 2.790 of the NRC's "Rules of Practice," Part 2, Title 10, Code of Federal Regulations, a copy of this letter and its enclosures will be placed in the NRC Public Document Room.
