This refers to the Nuclear Regulatory Commission (NRC) inspection conducted by D. R. Brewer on February 25, 1988 through March 25, 1988. The inspection included a review of activities authorized for your Turkey Point facility. Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selected examinations of procedures and representative records, interviews with personnel, and observation of activities in progress.

The inspection findings indicate that certain activities appeared to violate NRC requirements. The violations, references to pertinent requirements, and elements to be included in your response are described in the enclosed Notice of Violation.
