Safeguards Section
Nuclear Materials Safety and Safeguards Branch
Division of Radiation Safety and Safeguards

SUMMARY

Scope:

This routine, unannounced inspection was conducted in the areas of Management Support, Security Program Plans and Audits; Protected and Vital Area Physical Barriers, Detection and Assessment Aids; Protected and Vital Area Access Control of Personnel, Packages and Vehicles; Alarm Stations and Communications; Power Supply; Compensatory Measures; Safeguards Contingency Plan Implementation Review.

Results:

In the areas inspected, violations or deviations were not identified. Observation of Security Force operational activities during the course of the inspection confirmed continued improvement in the management and effectiveness of the security program. Progress on construction and installation activities associated with the security program upgrade, was on schedule. It appeared that coordination of activities relating to the security program upgrade were enhanced by the establishment of weekly meetings with representatives of all functional areas involved in the upgrade program, to track the status of action items and adjust scheduling as necessary. The weekly meetings are chaired by the site security superintendent. Continuing improvement in the appearance and professionalism of security force personnel was also noted.
